## **DETAILED ACTION**

### ***Election/Restriction***

1. This application contains claims directed to the following patentably distinct species of the claimed invention:

- I. An optical device having a first means having an aperture with a Fresnel number;
- II. An optical device having a first means of an opaque coating material and/or a diaphragm in the peripheral portion of the focusing lens;
- III. An optical device having means for allowing the optical alignment between the source of emission and focusing lens;
- IV. An optical device having means for reading optical code.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 directed to an optical device for focusing a laser beam is considered to be generic.

Please note with respect to claim 2, this claim recites separate details of the generically claimed invention of claim 1 which is/are not patentably distinct from the indicated species of the claimed invention, and will be examined with the generic claim 1 and the elected invention.

Art Unit: 2873

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

### ***Conclusion***

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to E.A. Lester whose telephone number is (703) 308-4943. The examiner can normally be reached on Monday-Friday from about 8:30 am to 6 pm.
